

Your Instructor

Jan Stephens has been featured in several magazines, including Southern Distinction Magazine and Step-By-Step Wire Jewelry Magazine. With a thirty-one year career as a professional educator and refined trainer, Jan blends her teaching expertise, intuition and distinctive design talents to provide an optimum training environment to grow beginning students into advanced creators of wire jewelry art. In her fun filled jewelry classes, Jan's students will learn the fundamentals of wire art jewelry. Bracelets, earrings, rings and pendants will be created in silver, copper, or brass wire and will incorporate natural stones, beads and faceted gems into various simple, yet elegant designs. Her classes are an entertaining and educational experience where students take lifetime skills as well as treasures with them at the end of each class.

For the past ten years Jan has annually studied at the William Holland School of Lapidary Arts and with renowned jewelry artists from across the country. Under the studio name Wrapsody Jewelry Studio, she displays her designs on her website (www.wrapsodyjewelry.com), at trunk shows, local jewelry and retail stores, and private showings.
